

PROJECT

1. MagicTask – Next-Gen Gamified Productivity Platform- [Link](#) April 2026 - May 2026

- **Dynamic Theme Architecture:** Implemented a gamified onboarding flow using JavaScript where users navigate from an initial landing page to select personalized visual "Realms" (**Retro, Futuristic, Minimalistic**), dynamically updating the entire UI theme.
- **Interactive Selection Interface:** Engineered an engaging, **interactive carousel** for realm selection using **HTML5** and advanced **CSS3 animations**, seamlessly blending high-quality graphics with a consistent dark theme and modern aesthetics.
- **Optimized User Journey:** Built a responsive and seamless transition from the primary hook ("Choose Your Realm") to a customized dashboard experience ("Make work, feel like play!"), ensuring high performance across all devices without relying on frontend frameworks.

2. Creative Commute - [Link](#) Feb 2026 - March 2026

- Converted multiple Figma designs into **pixel-perfect, responsive web pages** using **HTML, CSS, and JavaScript**.
- **Developed and optimized** key pages including main website and homepage layout, ensuring design consistency.
- Implemented **mobile-first responsive** layouts for **seamless experience across mobile, tablet, and desktop devices**.
- Matched **typography, spacing, colors, and UI components** precisely with the Figma design.
- Added **interactive UI behaviors** using **JavaScript** to improve **usability and engagement**.
- Ensured **cross-browser compatibility** and **clean, maintainable** frontend code.

3. Job Board(Next.js) - [Link](#) Oct 2025- Nov 2025

- Built a **full-stack job board** with **Next.js App Router, responsive UI, and secure auth using Clerk** implemented **role-based access** for **admin moderation**.
- Designed **MongoDB data models** for **Jobs and Applications** with **Mongoose**, using **references** and **populate** to join job details in application views.
- Developed **RESTful API routes** for posting jobs and applying: **POST/GET /api/applications** and **admin PATCH** for status updates with input **validation** and **error handling**.
- Implemented **applicant dashboard** to **track applications** with **status badges, resume links, and metrics (Total/Accepted/Pending/Rejected)** with dynamic data fetch.
- Created **admin dashboard** to review all applications, **update status (accept/reject)**, and **trigger transactional email notifications** on status change.
- Ensured production reliability: environment configuration on **Vercel, MongoDB Atlas connectivity**, and **cache busting** via revalidate/dynamic data strategies.

SKILLS

1. **Programing Skills** - Html , CSS , JavaScript
 2. **Frameworks** - React.js
 3. **Tools** - Codex, Gemini, ChatGpt, Perplexity, Github Copilot
-

EDUCATION

Bachelor of Computer Application

2022 - 2025

Amity University

- CGPA - 8.19
-

CERTIFICATIONS

- Completed the [Advance Excel](#) certification, illustrating expertise in data analytics and automation.
- Acquired [CSS \(Basics\)](#) certification, proving foundational skills in website design and styling.
- Completed [Professional and Life Skills](#) certification, teamwork, and problem-solving abilities.
